Hayden Robert Messerman, 23, resident of Missoula, MT passed away unexpectedly Sunday, June 28, 2015 in George, WA.

# Tribute Wall

SF

“ Dear Messerman family,  
I wanted you to know that I'm thinking of you. It was beautiful memorial for Hayden on the 3rd.  
It was an honor and great pleasure to have Hayden in Art as a freshman in high school. What an dedicated and creative student! It was so clear that he was part of a remarkable and very close family. You all have a part of Hayden in you that I could see before and after his untimely passing out of this world. When I see you, I know I will see him.

Sally

“ To our beloved Messerman family,  
Along with you our hearts are broken for the amazing man that this world lost. We are so blessed to have had him as a part of the Swiftwater family. We gathered together to celebrate, honor and grieve Hayden, on July 3rd. His calm nature, his poise, his teamwork...that smile, lives on inside all of us. The team signed rocks for Hayden, and climbed tippie hill, the mound that overlooks the winery (Hayden's workplace) to place the rocks. This historically preserved hill will never be removed by man...and neither will the legacy and memories that Hayden has left with us. From one sad family to another, we are sending you all our strength and love today and always.

“ July 1, 2015

*Dear Messerman family,*

*I am so very sad to learn about the tragic loss of Hayden. I can't even imagine the depth of your sorrow. Such a beautiful boy, both inside and out. Beautiful and kind. Gentle and soft-natured.*

*I remember Hayden as a quiet and very bright student. He took a Current Topics in Chemistry course from me in Winter 2013 in which he wrote an excellent review of a scientific paper as one of his assignments for the class. I remarked to him at the time how impressed I was with the quality of his work. He got 50 points out of 50 possible for that assignment and an A in the class. I cannot believe that he is gone.*

*Hayden also conducted research in my lab for a time. He worked cooperatively with others on a collaborative project involving two labs, two faculty, and several students. He showed promise and was patient with a difficult research problem. The world has lost a bright mind and gentle spirit.*

*I know that words cannot bridge the gap, cannot make you feel less pain or sorrow, but if they could, I would send them to you in great big buckets.*

*With all my concern and best to your family,*

*Carin Thomas, Chemistry, CWU*

“ Craig, Teresa and Forrest,  
Our thoughts and prayers go out to you in this difficult time. We reminisce often of the boys baseball days together. May happy memories comfort you.
