“ *I worked with and for Marland for many years at Hanford. He was the rare individual that could be both a boss and a great friend. I have so many memories that i couldn't share them all here. One comes to mind when me and my 10 year old son went fishing with Marland. i was on one side of the boat and my son and Marland were on the other. i noticed that I wan't catching many fish but my son was hauling them in right and left. Then i noticed that Marland was cutting bait and throwing it by my sones line. I just chuckled and watched my boy have a ball.*
